The report of the sale of THE WORLD, sent out from this city by some fabricator of falsehoods, is absolutely without any foundation in fact. The rumor was so absurd in its terms that it did not seem to call for a formal denial; but inasmuch as inquiries reach this office from remote parts of the country it may be said once and for all that is not for sale; that the question of a change in its ownership was never considered by its proprietor, and that it will continue to be what it has grown to be under his direction-the greatest newspaper and the foremost Democratic journal in the United States.

It is remarkable that a quality which should be, if not the cement, at least the sweetening of society is not found oftener n this city. Courtesy puts such a different color on every action. A man may be offered something which he wants, or granted some right, and the disagreeable manner in which it is done can spoil the asure it should give him. On the other and, one may be checked in something he desires, or something be denied to him, but courtesy accompanies the act, and he feels

Courtesy costs nothing to one's purse Usually its exercise imposes little labor. is a quality made up of forbearance, kindness, sympathy and tact. It is the oil which makes the machinery of social life run smoothly. A creaking wheel does not do its work well and is offensive, and the wheels of human intercourse will creak if they are rusted with discourtesy.

Americans are good-natured. Take a growd and see the good humor and patience it displays. But we are discourteous because so charged with business directness that we are brusque, have no time to waste on frills, and would rather jostle our neighbor than move him by suavity of address or manner. Courtesy is a virtue which may be well cultivated.

LOAD THE CHRISTMAS TREE.

By an other whole day the length of time before Christmas comes has been desed since THE EVENING WORLD printed its last appeal on behalf of those poor children for whom its Christmas-Tree Fund is being raised. But there is still time for all who find the impulse in their hearts to take advantage of this opportunity of doing a great good.

The way of real charity is, for those who valk in it, a broad avenue leading straight | she to the castle of Sure Reward. And what fine musician. charity can be more real than this that is -the proper clothing of shivering little bodies, the proper feeding of empty little stomachs, the warming and cheering of little hearts through the presentation of some of the trifles that go to make happy the lives and play-hours of more fortunate Oh, it's to be a noble growth, that Christ-

WANTS MORE STREET SWEEPERS.

Mr. BEATTIE has not kept the streets clean. He has, however, written a letter. Twice as many street sweepers as at pres ent are necessary, he says, to keep all the streets clean, and, to the end of increasing his force, he asks an increase in appropriations. If Mr. BEATTIE's facts are as exact as his financial logic, the additional money and sweepers should be forthcoming. The city, for its own health and comfort, cannot stint itself in this regard. But it should be sure of a return for its money.

GIVE US RAPID TRANSIT.

Col. HAIN absolutely denies that there is inreasonable delay on the west side Elevated road above Fifty-ninth street. Passengers who ride there daily declare that the road is terribly choked in commission hours, and that delays of half an hour are not infrequent. The moral of it all is the old one, that New York must have a sure, safe system of actual rapid transit, and must have it quickly.

Unless something gives way at Washington, the Senate's special committee on "looking into the financial situation" won't get far beyond the purely looking process. The Force-bill-free-coinage-antisilver-reapportionment fight may be interesting in its way, but to the business public it really seems as if the situation de manded at least the temporary substitution of the patriotic for the partisan, in National

VACRANT VERSES.

The Stopping at the Brook. At last our weary senses know How quiet are these bummer hills; Our horses, recking long ago, Now pause to dring where, cool and low The waysids brook its fountain fills.

O grateful pause! wherein we see No changing in the landscape round, No uniting of its seconty: What rest un immobility The eye has in all objects found!

O grateful pause! wherein we hear, in caim expansion over a!, The whisper of the pinewood near, And, lightly to the listening ear, The brook among its pebbles fall.

But now each borse has drunk, and he Whose looks but one desire reveal, Climbs to his seet, and soon we see
The shifting of the scenery
And only hear the rumbling wheel.

Even photographers are down on the high sleeve heads. This is the view a Broadway artist takes of them: "It is almost impossible to take a good picture of a lady that wears a frees with siceves puffed and elevated at the shoulders. Some of these 'shoulder humps are so high that they cause a shadow to be cast over the wearer's neck and lower part of the face. I have had several instances of spoiled nictures on this account. At first the fallure of the photograph to bring out the sitter's chin in strong relief puzzled me. I studied the matter for several days, and tried experiments with my patrons until I became satisfied that the trouble was caused by the high-topped beautiful voice with the most excellent effect sleeves. I demonstrated that such was the fact one day to a lady by drawing a scarf closely around her shoulders. Without the scarf all attempts to get a good picture of her failed. One of the richest effects produced in turs nowadays is the comparatively new introduction of applique designs in braid used as bordering or trimming on fur garments. It may be said that for needs no trumming, that it is perhaps even in better taste to leave it in its native unacorned beauty, but this braid embroidering is so skilfully done and is, withal, so novel in appearance, applied to the deep surface of the fur, that it is certainly very effective.
